

# Kennel cough symptoms

## Persistent cough

A dry, hacking sound. Sometimes described as a choking or honking noise.

## Gagging or retching

Dogs with kennel cough get lots of mucus in their throat which makes them gag.

## Runny nose

In particular, watch out for clear or cloudy snot.

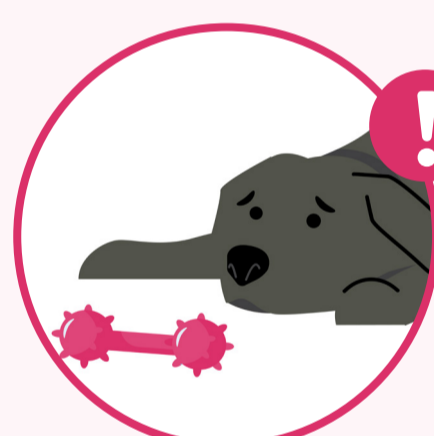

## Red or watery eyes

Kennel cough can cause irritated red eyes, or discharge from the eyes.

## Sneezing

Normally a sneeze is just a sneeze, but alongside other symptoms it often isn't.

## Lethargy!

Kennel cough can make dogs unusually tired and reluctant to play.

## Loss of appetite

Dogs who suddenly refuse to eat or drink may have a worsening infection.

## Fever

Very high body temperature, sometimes with green or yellow nasal discharge.

**If you notice any of these more serious symptoms, it's best to contact your vet right away.**
